SEE THE BENEFITS

of Bed Bug Eliminator from Ultimate Solutions

Bed Bug Eliminator controls bed bugs, mites, fleas, lice and chiggers. Made from 100% non-toxic, plant-based renewable source materials. Bed Bug Eliminator has a light, pleasant floral aroma, assuring comfortable, habitable space for family and guests. Safe for use around people with hyper-sensitive skin and fully biodegradable. The product will not affect the fiber or color of bedding materials and will not adversely affect indoor or outdoor environment quality.

HOW IT WORKS

Traditionally, exterminators use CO2 to suffocate the insects, resulting in them to be forced out, not killing them. With Bed Bug Eliminator, pests are attracted to its essential oils and as they walk over the product, it dries them out. After repeated treatments, the insect life cycle is broken.

DIRECTIONS FOR USE

Infestations: Generously spray bedding, standing mattress on end spraying every single side, including all piping and mattress seams. Spray the room and surrounding areas, especially along baseboards where the carpet meets the wall. Repeat daily for 3 days to break the insect life cycle.

Maintenance: Housekeeping should thoroughly spray mattress and bedding daily, using a trigger spray bottle set to a fine mist.

DESIGNED FOR:

- Bedding
- Rooms
- Closets
- Doorways
- Hallways
- HVAC Vents
- Housekeeping Areas
- Other Infested Areas

USED BY:

- Hotels
- Motels
- Prisons
- Hospitals
- Missions
- Institutions
